*The success of **UPKAR** began with its inception in the industrial town at Phagwara. The founder of the industry Mr. Suraj Parkash Miglani started the unit with the unflinching support. By sheer hard work he setup a manufacturing unit for Bicycle and Bicycle Parts, Pumping Sets, Generators & its accessories. Since then there is no looking back. By hiring the best tool makers, a keen eye for selective purchase of raw materials and stringent quality control. **UPKAR** became a leading manufacturer & exporter of **UPKAR** brand **Bicycle and Bicycle Parts, Centrifugal Pumps, Pumping Sets, Hand Tools & Engineering Items** as per drawing or sample. Slowly but steadily they kept on increasing the product range to meet the market demands.*

Within a short span, the company's Export sales have increased tremendously. There after, the export sales graph is ever rising. With the increasing dependence of western countries on the Indian market for their supply of Bicycle and Bicycle Parts, Pumping Sets & other tools.

*Teamwork is the major criteria behind the successful running of all **UPKAR** units. Today the name of **UPKAR** is synonymous with its manufacturing of Generator sets. It is only possible because we believe in the philosophy of customers satisfaction.*

By continuously monitoring customers needs we have been streamlining processes, cutting costs and our quick response to changing customers demands has enabled us to conquer the world future market place today
